

## Spit Tapcon Accessories - Condrive Installation Tool Kit

### Drill, Drive, Done

The key to Tapcon's fast installation is the range of multi-purpose condrive kits and specialised drill bits.

### Product Advantages

- Fast change from drilling to driving
- Eliminates need to change chucks and bits
- Eliminates need for two tools
- Special nut driver is recessed for torque control to reduce head breakage
- Includes bits for all sizes hex and phillips head

### Applications

- Specified for anchorage into concrete, brick or block.

### Installation

1. With sleeve off and drill bit exposed, drill pilot hole deeper than recommended anchor embedment. Snap proper anchor socket onto end of sleeve. Slide drive sleeve over drill bit.
2. Insert head of Tapcon anchor into hex or phillips socket.
3. Put point of anchor into pre-drilled hole and drive until anchor is fully seated.
4. Ensure that the drilling tool is not set to hammer action during installation.
